Skills

I am a senior full-stack web developer and project manager. My skill set includes (but is not limited to) Angular, Vue, React, Amplify, HTML, CSS, NodeJS, Python, Typescript, Bootstrap, PHP, ASP.NET, SQL, MySQL, AWS, DynamoDB, Serverless, GatsbyJS, Netlify, Contentful, Prismic, GitHub Copilot.

Experience

MAR 2022 - SEPT 2024

Intraprise, Yardley PA – *Senior Solutions Architect*

- Led a small team in the development and delivery of a cloud-based ETL system for healthcare leveraging Egnyte and AWS that processes hundreds of thousands of healthcare claims per day.
- Led a small team in the development and delivery of a pre-admissions healthcare cost calculator leveraging React, NodeJS microservices and PostgreSQL
- Principal designer, developer and architect of corporate public websites (see [links](#) section)

OCT 2016 - JULY 2021

RobustWealth, Lambertville NJ – *Director Enterprise Technology*

- I managed the development of a web-based dashboard used to administer account, billing eSignature and trading workflows, user management and troubleshooting across a suite of financial systems.
- Led development on a complete financial product suite including a web-based financial advisor portal, client portal, and trading dashboard.
- I joined the firm when it was a struggling fintech startup and led a young development team to success culminating in our acquisition by Principal Financial Group.

AUG 2004 - OCT 2016

MobileMD, Yardley PA – *Senior Full Stack Developer*

- Full-stack developer in a Microsoft ASP.NET development team in Healthcare Technology.
- Joined the firm when it was a struggling startup and worked with a small development team pioneering EMR solutions that brought the firm success culminating in acquisition by Cerner Health.

SEPT 2000 - NOV 2004

Merrill Lynch, Plainsboro NJ – *Senior Full Stack Developer*

- Lead developer on a team developing the web-based *Working Cash Management* tool.

Education

Rowan University, NJ - *Bachelors of Arts*

Recent Awards

First place, RobustWealth Hackathon 2018. I developed a headless CMS integration using Wordpress that allowed Service, Regulatory and Marketing teams to insert content into our client and advisor dashboards.
